NETWORKING SOLUTIONS

Seamless, Secure, and Scalable

EMBRACE THE POWER OF CONNECTIVITY

Whether you're seeking mobility with **Cradlepoint**, simplicity with **Ubiquiti**, or transformative network management with **Meraki**, our networking solutions offer unique strengths that empower businesses in the digital age.

UNINTERRUPTED CONNECTIVITY, EVEN IN CHALLENGING ENVIRONMENTS

Cradlepoint is a mobile broadband router that utilizes 5G and 4G cellular networks to gain Internet connectivity. While similar to a MiFi hotspot, Cradlepoint offers stronger signal reception due to its larger antennas and provides additional connectivity options through hardwired ports, making it a versatile choice for both mobile and stationary network setups. Ideal for front-line emergency workers and arbitration or meeting rooms that are unable to use a venue's Internet connection.

SKU BFA130005

INTUITIVE PLATFORM THAT SIMPLIFIES NETWORK SETUP AND MANAGEMENT

Ubiquiti UniFi amplifies existing Internet connections through a network of WiFi access points to cover large areas and accommodate more users. These temporary network infrastructures can easily be scaled up or down, making them the perfect solution for large trade show booths, with multiple access points to ensure full coverage.

SKU UBBUSBRKIT

ADVANCED SECURITY FEATURES TO PROTECT AGAINST CYBER THREATS

Cisco Meraki offers enterprise-grade security for Internet-connected devices, routers, switches, firewalls, and WiFi networks your company uses through an Internet-connected browser. With heightened security features, Meraki protects sensitive information by allowing organizations to operate anywhere in the world using their own security features and VPN, making this a great tool for Financial and Pharmaceutical meetings and events.

SKU MX68WHW

Each option allows for both wired and wireless networking connectivity and can be combined to create a robust stand-alone network. For more details, please contact your SmartSource® sales representative.
